European partners in clean power

NESO's strategic energy plans are developing the future offshore electricity transmission needs of Great Britain

SCAN
ME!

For questions or inquiries, please email:
Kieran.Watkins@neso.energy

NESO
National Energy
System Operator

Following a record-breaking clean energy auction at the turn of the year, we're thrilled to be taking the UK Pavilion to WindEurope once again and looking forward to an exciting week in Madrid.

The four nations of the UK now boast a combined 32GW of wind energy and over 12,000 turbines, whilst the companies represented on the stand embody the deeply experienced supply chain and world-leading expertise that is driving our sector forward.

Clean energy is a core part of the UK Government's industrial strategy and, having secured almost 10GW of wind capacity in the latest CfD auctions, the country is looking towards closer collaboration with its European neighbours to boost supply chain growth and resilience, bolster our collective energy security, support a robust electricity market, and lower barriers to energy trading.

RenewableUK remains firmly committed to forging closer ties with the European renewables sector, in areas like the North Seas and beyond, as a key driver of both export opportunities and crucial inward investment. And with the next auction round set to open later this year, we are excited to showcase the tremendous opportunity for investment in new generation and transmission that the UK market provides.

We would like to thank our partners and co-exhibitors for their support, and extend a warm invitation for delegates to join our drinks receptions and stand events to celebrate our collective progress and make lasting connections.

Elizabeth Conboy
Executive Director,
Commercial, RenewableUK

UK wind energy supply chain and industrial growth

Existing and emerging clusters of offshore-wind focused industry

- Existing and emerging clusters of industry
- T Turbine, blades & towers
- F Foundations & substructures
- C Electrical systems & cables
- E Environmental services
- I Installations, operations & maintenance

Facilities

- Existing major facilities
- Ports and potential major facilities
- Academic partnerships and test centres

Areas of cross-sectoral collaboration

- Technology development
- Advanced turbine technology
- Foundations and substructures
- Electrical systems and cables
- Smart environmental services
- Installaton, operations & maintenance

The established voice of the UK's renewable energy industry, we support the UK renewable energy sector by:

- Hosting award-winning events.
- Providing accurate and high-quality news, insight and business intelligence
- Actively collaborating with members to advocate for policies that address challenges and unlock investment
- Advocating passionately for the sector to the public, driving awareness, supporting net zero goals, and highlighting the sector's benefits.
