ANNUAL EVENT
2025
COPENHAGEN
8-10 APRIL

**LEADERS IN OFFSHORE
SERVICE LOGISTICS
ACROSS EUROPE**

north-star.co.uk

The UK Group Pavilion is back at WindEurope, and we're ready for a fantastic week in Copenhagen!

The UK continues to hold its position as a world leader in renewable energy, and our Pavilion showcases the world-class expertise at play across our four nations, driving 30.4GW of wind capacity. The companies represented on the stand celebrate the very best of the UK supply chain and are here to explore collaboration and strengthen ongoing partnerships.

This past year, RenewableUK has worked hard to navigate the evolving political landscape, both domestic and global. We have welcomed a new UK government eager to drive the development of the sector, and celebrated key milestones like the launch of the Industrial Growth Plan and establishing of the Onshore Wind Task Force — all of which will shape new opportunities for our members. Now, possibly

more than ever, RenewableUK remains convinced of to the collective strength of the European renewables sector and is committed to the UK's prominent role within this effort. Together, we can achieve so much.

A huge thank you to our Headline Sponsor, Country Partners and Co-exhibitors for their support. Join us at our drinks receptions and stand events to connect, collaborate, and celebrate.

Elizabeth Conboy
Executive Director,
Commercial, RenewableUK

The size of the UK market

The UK's total wind capacity (onshore and offshore) currently stands at 30.4GW, with RenewableUK's EnergyPulse forecasting it to more than double to 66GW by 2030. To achieve and exceed these forecasts, the UK Government and the National Electricity System Operator have set ambitious goals through the Clean Power Action Plan, alongside key reforms to the Contracts for Difference scheme and planning regulations to accelerate deployment.

Talk to a member of the RenewableUK team to learn more about how we're supporting the government and our members in achieving these goals.
